TOXICOLOGY

SUBJECT INDEX

Volume 64 (1990)

air pollution, arsenic, cadmium, heavy metals, glutathione, Co-exposure, 191
alpha-fetoprotein, heavy metals, maternal serum, amniotic fluid, mouse, pregnancy, 19
ambient temperature, sodium selenite, toxicity, mice, plasma enzymes, glutathione, 245
δ-aminolevulinic acid dehydratase, lead poisoning, chelation therapy, essential metals depletion, zinc supplementation, rat, 129
amniotic fluid, alpha-fetoprotein, heavy metals, maternal serum, mouse, pregnancy, 19
angiotensin converting enzyme, captopril intoxication, atrial natriuretic factor, 325
antioxidant, butylated hydroxyanisole (BHA), indomethacin, mucus, prostaglandins, stomach mucosa, forestomach, 281
arsenic, cadmium, heavy metals, glutathione, Co-exposure, air pollution, 191
atrial natriuretic factor, captopril intoxication, angiotensin converting enzyme, 325

B6C3F_1 mice, vinylidene fluoride, blood concentrations, blood sampling methodology, mice, 255
B6C3Fl mice, trichloroacetate, dichloroacetate, c-myc, c-ras, hepatocarcinogenesis, 47
behavioural effects, toluene, malnutrition, fetotoxicity, developmental toxicity, 155
bis(helenalinyl)malonate, sesquiterpene lactone toxicity, bis(helenalinyl)malonate organ toxicity, 205
bis(helenalinyl)malonate organ toxicity, sesquiterpene lactone toxicity, bis(helenalinyl)malonate, 205
bis(tri-*n*-butyltin)oxide, immunotoxicity, rat, organotin, tributyltin oxide, 169
blood concentrations, vinylidene fluoride, B6C3F_1 mice, blood sampling methodology, mice, 255
blood sampling methodology, vinylidene fluoride, blood concentrations, B6C3F_1 mice, mice, 255
bromohydroquinone, species differences, γ-glutamyl transpeptidase, nephrotoxicity, glutathione conjugates, 291
bronchoalveolar lavage fluid, copper, lung, intratracheal instillation, metallothionein, inflammatory response, 223
butylated hydroxyanisole (BHA), antioxidant, indomethacin, mucus, prostaglandins, stomach mucosa, forestomach, 281

cadmium, arsenic, heavy metals, glutathione, Co-exposure, air pollution, 191
cadmium, metallothionein, metallothioneinuria, cadmium-exposed population, environmental cadmium exposure, renal dysfunction, 59
cadmium, rats, delayed nephrotoxicity, indirect effects, chelation, subcellular distribution, 235
cadmium-exposed population, cadmium, metallothionein, metallothioneinuria, environmental cadmium exposure, renal dysfunction, 59
cadmium teratogenicity, gene regulation, metal ions, metallothionein, midgestation mouse embryo, in situ hybridization, zinc, 89
captopril intoxication, angiotensin converting enzyme, atrial natriuretic factor, 325
cellular systems, nickel, lipid peroxidation, defense systems, 1
chelation, cadmium, rats, delayed nephrotoxicity, indirect effects, subcellular distribution, 235
chelation therapy, lead poisoning, essential metals depletion, zinc supplementation, δ-aminolevulinic acid dehydratase, rat, 129
cis-diamminedichloroplatinum, metallothionein, glutathione, nephrotoxicity, 113
c-myc, trichloroacetate, dichloroacetate, c-ras, hepatocarcinogenesis, B6C3Fl mice, 47
Co-exposure, arsenic, cadmium, heavy metals, glutathione, air pollution, 191

copper, lung, intratracheal instillation, metallothionein, bronchoalveolar lavage fluid, inflammatory response, 223
c-ras, trichloroacetate, dichloroacetate, c-myc, hepatocarcinogenesis, B6C3Fl mice, 47

defense systems, nickel, lipid peroxidation, cellular systems, 1
delayed nephrotoxicity, cadmium, rats, indirect effects, chelation, subcellular distribution, 235
developmental toxicity, toluene, malnutrition, fetotoxicity, behavioural effects, 155
dichloroacetate, trichloroacetate, hepatotoxicity, hyperplasia, necrosis, 33
dichloroacetate, trichloroacetate, toxicity, subchronic, enzymes, immunotoxicity, 71
dichloroacetate, trichloroacetate, c-myc, c-ras, hepatocarcinogenesis, B6C3Fl mice, 47

environmental cadmium exposure, cadmium, metallothionein, metallothioneinuria, cadmium-exposed population, renal dysfunction, 59
enzymes, dichloroacetate, trichloroacetate, toxicity, subchronic, immunotoxicity, 71
essential metals depletion, lead poisoning, chelation therapy, zinc supplementation, δ-aminolevulinic acid dehydratase, rat, 129

fetotoxicity, toluene, malnutrition, developmental toxicity, behavioural effects, 155
forestomach, butylated hydroxyanisole (BHA), antioxidant, indomethacin, mucus, prostaglandins, stomach mucosa, 281

gene regulation, cadmium teratogenicity, metal ions, metallothionein, midgestation mouse embryo, in situ hybridization, zinc, 89
γ-glutamyl transpeptidase, species differences, nephrotoxicity, bromohydroquinone, glutathione conjugates, 291
glutathione, arsenic, cadmium, heavy metals, Co-exposure, air pollution, 191
glutathione, *cis*-diamminedichloroplatinum, metallothionein, nephrotoxicity, 113
glutathione, glutathione-*S*-transferase, hepatic and extra-hepatic tissues, monocrotophos, thiol analogues, kinetics of inhibition, 271
glutathione, sodium selenite, toxicity, mice, ambient temperature, plasma enzymes, 245
glutathione-*S*-transferase, glutathione, hepatic and extra-hepatic tissues, monocrotophos, thiol analogues, kinetics of inhibition, 271
glutathione conjugates, species differences, γ-glutamyl transpeptidase, nephrotoxicity, bromohydroquinone, 291

heavy metals, alpha-fetoprotein, maternal serum, amniotic fluid, mouse, pregnancy, 19
heavy metals, arsenic, cadmium, glutathione, Co-exposure, air pollution, 191
hepatic and extra-hepatic tissues, glutathione, glutathione-*S*-transferase, monocrotophos, thiol analogues, kinetics of inhibition, 271
hepatocarcinogenesis, trichloroacetate, dichloroacetate, c-myc, c-ras, B6C3Fl mice, 47
hepatotoxicity, dichloroacetate, trichloroacetate, hyperplasia, necrosis, 33
5-hydroxyindolacetic acid, phenoxyherbicides, pre- and postnatal exposure, 5-hydroxytryptamine, 265
5-hydroxytryptamine, phenoxyherbicides, pre- and postnatal exposure, 5-hydroxyindolacetic acid, 265
hyperplasia, dichloroacetate, trichloroacetate, hepatotoxicity, necrosis, 33

immunotoxicity, dichloroacetate, trichloroacetate, toxicity, subchronic, enzymes, 71
immunotoxicity, rat, organotin, tributyltin oxide, bis(tri-*n*-butyltin)oxide, 169
indirect effects, cadmium, rats, delayed nephrotoxicity, chelation, subcellular distribution, 235
indomethacin, butylated hydroxyanisole (BHA), antioxidant, mucus, prostaglandins, stomach mucosa, forestomach, 281
inflammatory response, copper, lung, intratracheal instillation, metallothionein, bronchoalveolar lavage fluid, 223
intratracheal instillation, copper, lung, metallothionein, bronchoalveolar lavage fluid, inflammatory response, 223
in situ hybridization, cadmium teratogenicity, gene regulation, metal ions, metallothionein, midgestation mouse embryo, zinc, 89

kidney, *P*-450, *P*-450IIE1, liver, lung, *P*-450 induction by acetone, 141
kidney, UDPglucuronyltransferase, mercury, mercuric chloride, 81
kinetics, senecionine, pyrrolizidine alkaloids, metabolism, 179
kinetics of inhibition, glutathione, glutathione-*S*-transferase, hepatic and extra-hepatic tissues, monocrotophos, thiol analogues, 271

lead poisoning, chelation therapy, essential

metals depletion, zinc supplementation, δ-aminolevulinic acid dehydratase, rat, 129
lipid peroxidation, nickel, cellular systems, defense systems, 1
liver, *P*-450, *P*-450IIE1, kidney, lung, *P*-450 induction by acetone, 141
lung, copper, intratracheal instillation, metallothionein, bronchoalveolar lavage fluid, inflammatory response, 223
lung, ozone, phospholipids, surfactant, 313
lung, *P*-450, *P*-450IIE1, liver, kidney, *P*-450 induction by acetone, 141

malnutrition, toluene, fetotoxicity, developmental toxicity, behavioural effects, 155
maternal serum, alpha-fetoprotein, heavy metals, amniotic fluid, mouse, pregnancy, 19
mercuric chloride, UDPglucuronyltransferase, mercury, kidney, 81
mercury, UDPglucuronyltransferase, kidney, mercuric chloride, 81
metabolism, senecionine, pyrrolizidine alkaloids, kinetics, 179
metallothionein, *cis*-diamminedichloroplatinum, glutathione, nephrotoxicity, 113
metallothionein, cadmium, metallothioneinuria, cadmium-exposed population, environmental cadmium exposure, renal dysfunction, 59
metallothionein, cadmium teratogenicity, gene regulation, metal ions, midgestation mouse embryo, in situ hybridization, zinc, 89
metallothionein, copper, lung, intratracheal instillation, bronchoalveolar lavage fluid, inflammatory response, 223
metallothioneinuria, cadmium, metallothionein, cadmium-exposed population, environmental cadmium exposure, renal dysfunction, 59
metal ions, cadmium teratogenicity, gene regulation, metallothionein, midgestation mouse embryo, in situ hybridization, zinc, 89
mice, sodium selenite, toxicity, ambient temperature, plasma enzymes, glutathione, 245
mice, vinylidene fluoride, blood concentrations, B6C3F$_1$ mice, blood sampling methodology, 255
midgestation mouse embryo, cadmium teratogenicity, gene regulation, metal ions, metallothionein, in situ hybridization, zinc, 89
monocrotophos, glutathione, glutathione-*S*-transferase, hepatic and extra heptaic tissues, thiol analogues, kinetics of inhibition, 271
mouse, alpha-fetoprotein, heavy metals, maternal serum, amniotic fluid, pregnancy, 19
mucus, butylated hydroxyanisole (BHA), antioxidant, indomethacin, prostaglandins, stomach mucosa, forestomach, 281

necrosis, dichloroacetate, trichloroacetate, hepatotoxicity, hyperplasia, 33
nephrotoxicity, *cis*-diamminedichloroplatinum, metallothionein, glutathione, 113
nephrotoxicity, species differences, γ-glutamyl transpeptidase, bromohydroquinone, glutathione conjugates, 291
nickel, lipid peroxidation, cellular systems, defense systems, 1

organotin, immunotoxicity, rat, tributyltin oxide, bis(tri-*n*-butyltin)oxide, 169
ozone, lung, phospholipids, surfactant, 313

P-450, *P*-450IIE1, liver, kidney, lung, *P*-450 induction by acetone, 141
P-450IIE1, *P*-450, liver, kidney, lung, *P*-450 induction by acetone, 141
P-450 induction by acetone, *P*-450, *P*-450IIE1, liver, kidney, lung, 141
phenoxyherbicides, pre- and postnatal exposure, 5-hydroxytryptamine, 5-hydroxyindolacetic acid, 265
phospholipids, ozone, lung, surfactant, 313
plasma enzymes, sodium selenite, toxicity, mice, ambient temperature, glutathione, 245
pre- and postnatal exposure, phenoxyherbicides, 5-hydroxytryptamine, 5-hydroxyindolacetic acid, 265
pregnancy, alpha-fetoprotein, heavy metals, maternal serum, amniotic fluid, mouse, 19
prostaglandins, butylated hydroxyanisole (BHA), antioxidant, indomethacin, mucus, stomach mucosa, forestomach, 281
pyrrolizidine alkaloids, senecionine, metabolism, kinetics, 179

rat, immunotoxicity, organotin, tributyltin oxide, bis(tri-*n*-butyltin)oxide, 169
rat, lead poisoning, chelation therapy, essential metals depletion, zinc supplementation, δ-aminolevulinic acid dehydratase, 129
rats, cadmium, delayed nephrotoxicity, indirect effects, chelation, subcellular distribution, 235
renal dysfunction, cadmium, metallothionein, metallothioneinuria, cadmium-exposed population, environmental cadmium exposure, 59

senecionine, pyrrolizidine alkaloids, metabolism, kinetics, 179

sesquiterpene lactone toxicity, bis(helenalinyl)malonate, bis(helenalinyl)malonate organ toxicity, 205
sodium selenite, toxicity, mice, ambient temperature, plasma enzymes, glutathione, 245
species differences, γ-glutamyl transpeptidase, nephrotoxicity, bromohydroquinone, glutathione conjugates, 291
stomach mucosa, butylated hydroxyanisole (BHA), antioxidant, indomethacin, mucus, prostaglandins, forestomach, 281
subcellular distribution, cadmium, rats, delayed nephrotoxicity, indirect effects, chelation, 235
subchronic, dichloroacetate, trichloroacetate, toxicity, enzymes, immunotoxicity, 71
surfactant, ozone, lung, phospholipids, 313

thiol analogues, glutathione, glutathione-*S*-transferase, hepatic and extra heptaic tissues, monocrotophos, kinetics of inhibition, 271
toluene, malnutrition, fetotoxicity, developmental toxicity, behavioural effects, 155
toxicity, dichloroacetate, trichloroacetate, subchronic, enzymes, immunotoxicity, 71
toxicity, sodium selenite, mice, ambient temperature, plasma enzymes, glutathione, 245
tributyltin oxide, immunotoxicity, rat, organotin, bis(tri-*n*-butyltin)oxide, 169
trichloroacetate, dichloroacetate, hepatotoxicity, hyperplasia, necrosis, 33
trichloroacetate, dichloroacetate, toxicity, subchronic, enzymes, immunotoxicity, 71
trichloroacetate, dichloroacetate, c-myc, c-ras, hepatocarcinogenesis, B6C3Fl mice, 47

UDPglucuronyltransferase, mercury, kidney, mercuric chloride, 81

vinylidene fluoride, blood concentrations, $B6C3F_1$ mice, blood sampling methodology, mice, 255

zinc, cadmium teratogenicity, gene regulation, metal ions, metallothionein, midgestation mouse embryo, in situ hybridization, 89
zinc supplementation, lead poisoning, chelation therapy, essential metals depletion, δ-aminolevulinic acid dehydratase, rat, 129
